Profile

Hard-working and problem-solving oriented developer passionate about creating websites. I'm very people oriented and love to motivate those around me. I love to learn as much as possible and be able to share that knowledge with others.

Relevant Skills

- Soft Skills: Problem solving, critical thinking, communication, team player, organization, dependability
- Technical Skills: Javascript, ReactJS, Node.js, Python 3, UML, HTML5, CSS, JSON, Git, Databases, SCSS/SASS, Flexbox, CSS Grid, Django, SQL, APIs, Photoshop, Web design, IT security

Projects

- **Netherlands Travel Site:** This was a site I made for my Intro to Javascript class in college. I used Javascript, Bootstrap, HTML, and CSS for the project. The assignment was to utilize Javascript throughout the project and pick a topic of your choice. Having a passion for travel, I picked a destination I frequented often.

- **Bottega Capstone Website Project:** This was my final website project for the coding school I attended. The requirements had to have a front end and a backend, an authentication feature, something new you did not learn in the program, and to demonstrate a full understanding of key concepts. I chose to showcase a group of friends and our characters we made together and to tell about our group of characters. <https://hotfrontend.herokuapp.com/>

Work Experience

- **[Granite Telecommunications], NetOps Tech Tier 2**
Sept 2021-Current
 - Helped to diagnose issues with modems, routers, and mobility devices
